

BIG PARK CITY STRIKE

The California Winze Drops Into a Big Ore Body.

ZINC, LEAD AND SILVER

PROGRESS AT THE ANNIE LAURIE'S NEW MILL.

W. L. Snyder of the California mine, in Thayne's canyon, Park City, came down from camp yesterday on his way to Provo. He reports a most important discovery as having been made in the winze which is being sunk from the upper tunnel level. He says that for some distance the winze went down on the hanging wall side of the vein, ore being taken out down to a layer of shale, which, for a time, was taken for the footwall. The other day it was decided to go down through the shale and determine what was below. After going through a very few inches of the shale, ore was encountered again, and when Mr. Snyder led twelve feet of it in addition to the ore being taken out, there was still no signs of the footwall. This ore is not quite as rich as the first, but it proves a most abundant concentrating material. It carries 35 per cent zinc, 17 per cent lead and from six to eight ounces of silver. The Huntington mill and Wilfley tables separate the zinc from the other materials with the greatest ease and accuracy.

LEADVILLE MINE ON FIRE

The R. A. M. Property Sustains a Loss of \$40,000.

Leadville, Colo., Sept. 3.—The R. A. M. mine in this district, employing 150 men, all of whom will probably get out, as the mine has many connections. The probable loss will be about \$40,000.

ANNIE LAURIE MILL

Structure to be Finished by the End of the Month.

Joe Delderich, who has the contract for the construction of the new 100-ton mill at the Annie Laurie company's Gold Mountain bonanza, came up from there yesterday. He says that work upon the mill structure is progressing rapidly and he expects to have it completed by the end of this month. The machinery is nearly all on the ground, and another sixty days will see the big plant about ready to go into commission. The electric power house has not yet been started, but all the materials for that are also on the ground, and Mr. Delderich says work upon it will probably begin during this week. The 900-foot flume which is to convey water to the mill is being run under way, and another week or ten days will witness its completion.

Speaking of the purposes of the company a few days since, Manager Filler said that the splendid milling and power plants were being pushed as rapidly as was consistent with good work, and though it would be possible to do so, if necessary, he did not expect the mill would begin regular operations until about the middle of the time when the mill was ready to start there would be no difficulty in keeping it going. The intention was to operate through the winter as well as summer months, and everything had been arranged in the plant to allow work to proceed in the coldest weather.

UINTAH COUNTY MINES.

Wm. O'Neil Arranging For a Shipments From the Ex Mine.

(Special Correspondence.)

Vernal, Sept. 2.—William O'Neil came in from Jesse Ewing canyon last night and will leave for Salt Lake today to attend the coming state convention of his party. Mr. O'Neil reports that the strike in the district of the Jesse Ewing district, where he is making arrangements for a shipment of ore from the mines, is progressing. He says that the strike in the district is holding out nicely, says Mr. O'Neil, who brought with him some fine specimens to back up his assertions.

D. W. Munday is also in town from Red Creek, and reports that the Uintah strike is holding out nicely, and that he is manager are looking better every day as the work of development progresses.

RENO SMELTER FINISHED.

A Half Dozen Mines Now Hauling Ore to It.

(Reno Journal.)

Beginning with a little batch of 1,000 pounds of ore from Peavine a little over a week ago, the receipts at the new smelter have been increasing. Every day the ore wagons drive up and unload, and the output of the smelter is being received, sampled and paid for.

The smelter is ready for business, but will not be charged until about Wednesday. The first copper pig will be exhibited at the state fair. It is a pity that the smelter is not in the Reno Milling & Smelting company will not make a success of smelting ores. Even if they don't make big money out of the smelter, they will get his money, cash on the nail. He should haul in his ore and let Cooley do the working.

The best exhibit Washoe county can make to the people who visit the fair will be the piles of ore from nearby mines and the steady stream of molten copper running from the furnace.

COPPER WILL ADVANCE.

Not Known Where the Supply Is to Come From.

(Boston News Bureau.)

The copper market in its different phases shows unabated strength and a firm undertone. Holders have the market largely in their control, and although seemingly unconscious of the fact, prices are being allowed to build up skyward from the 16 1/2-cent level by any wild movement.

Things are beginning to look somewhat serious, however, regarding supplies for the home trade in the months to come, and where they are to be obtained. The market may become subject to acute contractions if copper continues to leave the country at the rate it is doing at present. Home consumers want their supplies, and the requirements may become more imperative later on.

A large domestic consumption of the coming fall and winter is likely to produce a scrambling and climbing for copper in this country as well as Europe. It is evident that the market is in an interesting period between now and next January.

A local brass manufacturer, when questioned yesterday regarding copper, said: "There is almost a scarcity of copper at the moment. The outlook for the industry appears to be the best ever known. The demand for electrical purposes is very heavy and constantly increasing, and will, I believe, take care of any increase which may occur in the output of the metal. There does

MAKING BIG MONEY.

Smelter Trust Earnings on Common and Preferred Stock.

Acting Treasurer Adams of the American Smelting & Refining company is quoted as saying that no statement will be given out as to the annual earnings for Sept. 12, but that earnings for the first fiscal year ended April 30 are approximately \$3,400,000, sufficient to pay more than 7 per cent on common and regular 7 per cent on preferred. It is the company's intention not to declare a common dividend, but to keep the surplus for betterments. No changes among officers are expected.

CENTENNIAL-EUREKA.

Winze From the 800 New Being Sent Down.

Manager Allen of the Centennial-Eureka bonanza stated yesterday that work was being done on the new winze, the Good Hope winze, which has been started down from the 800 level. The last report from the mine was that fifteen feet had been sunk and that good ore was being passed through. Mr. Allen says the mine is opening up bigger and better all the time.

Nevada Mining Items.

(Reno Journal.)

Operations have been resumed in the Star shaft at Cherry Creek, White Pine county.

The extraction mill in Esmeralda county is running steadily on ore from the Wilson mine.

The nine-mile cyanide plant in Esmeralda county is working thirty tons of tailings a day.

Work has been resumed in the Wheeler cyanide plant at Pine Grove, Esmeralda county.

Jim Yerington has put a number of men to work on his infusorial earth deposit along with C. and C. and has shipped some to be made at once to the east. White men do not like to be in the fine white dust that arises from the quarry, and thus far it has been necessary to hire Indians.

Park Mining Notes.

(Park Record.)

William D. Bogan was over from Snake creek the first of the week, returning Wednesday. He says considerable work is being done on the new winze, however, has yet struck a bonanza, though they all expect to meet any day.

Joe Chambers, J. J. Daly and Judge Morris Sommer were among the miners who arrived on this morning's train. Mr. Daly says it is a little early yet for Bonanza Flat news, but Mr. Sommer asserted that before he left the Park he expected to have a little more news to report.

A force of twelve men are now at work cleaning up, laying pipe and track on the 1200 level of the Daly property, and it is expected that the mine will be ready to start work in this property, which has been practically idle the past three years.

Things are expected to be moving on Monday, and before many days we may expect to hear good news from this old bonanza.

Foreman J. B. Fleming of the Silver King mill went down to Salt Lake Thursday to approve the order that the company has given to the millwright to build a new steel tower and one steel tension station for the Silver King aerial tram, the height of these towers having been determined upon.

The framing of timbers for the new sampler was started yesterday and will be rushed with all speed. The contract for the lumber for the sampler and loading station, coal house, etc., has also been let. Over 500,000 feet of lumber will be required for these improvements, and the Summit Lumber company of Park City was the successful bidder and awarded the contract for furnishing this material.

Following are the shipments of ore from the Mackintosh sampler for the past week:

Silver King	1,485,000
Daly-West	1,255,000
Anchor Con.	280,000
Ontario	175,000
California Con.	24,000
Total number of pounds	3,219,000

Mining Notes.

President L. C. Huck of the Annie Laurie company is scheduled to arrive from Salt Lake today.

M. S. Aschheim has returned from a many months' sojourn in New York, where he has been engaged in the study of the history of the United States and returns feeling first-class. He expects to stay in Utah for some time.

With the control of the Sunbeam at Thine now in the hands of Messrs. Keith and Keams and with the superintendency of Thomas L. Walden, the outlook for the future of the mine is bright.

The big shipment of ore from the Star Consolidated marketed on Saturday is reported to have netted the company about \$60 per ton, and another carload of ore much richer than that is to be marketed this week.

A gentleman just up from the diggings says that the Copper King company's property adjacent to the Copper King mine, in Beaver county, has a shaft down some thirty feet in solid granite and declares there is not a sign of copper about the works. He says the ground is not on a mineral zone at all.

Advices from Park City are to the effect that William M. Curtis has put his property in the hands of a receiver, and that the property is being sold. The receiver is said to be a man of means, and the property is being sold for the benefit of the creditors.

E. D. Waterman says that E. G. Rogers, who has been in the city for some time, is a man of means, and the property is being sold for the benefit of the creditors.

Warning to the Public.

Before buying Buckeye Mining company stock, verify same by telephoning the secretary, No. 588. There are thousands of shares of illegally issued stock out.

BUCKEYE MINING COMPANY.

Twenty-four Hour Race Postponed until tonight at Salt Palace. Labor day reserved seat coupons and rain checks good tonight. Preliminary races begin at 8:30.

TABERNACLE CHOR EXCURSION

Beautiful Ogden Canyon, Via Oregon Short Line.

Friday, Sept. 7. Round trip to Ogden only \$1. Bicycles carried free. Special train leaves 8 a. m.

BRYAN AND ROOSEVELT ON THE SAME PLATFORM

(Continued from page 1.)

men ought to be free and independent. This is merely a generalization of the French school of Voltaire and the encyclopedists. It is a dictum absolutely lacking foundation in history and capable of syllogism. Justification is, however, a handy phrase for us to employ when asserting our right to break away from the mother country; it suits the exigencies of the case. In 1776 admirably, though in itself but a bit of sublimated demagogism. The declaration was a serviceable means to the end that those who were discredited. To bring forward this declaration in this year 1900 in connection with the centennial of the signing of the Declaration of Independence is as gross an absurdity as ever was practiced. To do so is to offer an insult to the intelligence of the people who have subscribed to the declaration in question.

Power in Labor Vote.

"But why quote from newspapers as to what may be done hereafter in the presence of a law already enacted which makes subjects of the Porto Ricans, which draws from them the guarantees of the constitution and asserts the power of taxation without their consent and tax them without representation—a power as unlimited and as arbitrary as that of the monarch exercised by any ruler in all the history of the human race. This doctrine has been approved by the people and it furnishes the supreme question of the present campaign. In the presence of these perils the laboring man has a responsibility which he cannot shirk. Without a large percentage of the laboring vote no party can win an election in the United States. The men who are in the habit of throwing their votes on the one side or the other determine the policy of the nation, and they are the only ones who need not adorn themselves with the insignia of any party, but on election day their silent ballots should speak for the laboring man and either bring the government back to its ancient landmark or turn it into the pathway followed by empires of the end of the world."

Speech of Roosevelt.

Governor Roosevelt said in part:

"Bar far the greatest problem, the most far-reaching in its stupendousness, is that of the people who have grown to speak of as the labor question. The foundation of our whole social structure rests upon the material and moral well-being, the intelligence, the energy and the patriotism of the wage-worker. This is doubly the case now, for, in addition to each man's individual capacity, there is a collective capacity through the state in many matters; that in other matters the state is the only power that can act. The foundation of our whole social structure rests upon the material and moral well-being, the intelligence, the energy and the patriotism of the wage-worker. This is doubly the case now, for, in addition to each man's individual capacity, there is a collective capacity through the state in many matters; that in other matters the state is the only power that can act."

"When we come to dealing with our social and industrial needs, remedies, rights and wrongs, a ton of oratory is not worth an ounce of common sense. The fundamental law of healthy political life in this republic is that the government is not to be run by a few men, but by the people in deed and not merely in name. It is to be run by the people in deed and not merely in name. It is to be run by the people in deed and not merely in name."

"The more a healthy American sees of the more men, the greater grows his conviction that our chief troubles come from mutual misunderstandings. In the course of the campaign we are to see the point of view. In other words, the great need is fellow-feeling, sympathy, brotherhood; and all this naturally comes from a common understanding of vital importance that there should be such association. The most serious danger to the country is the isolation of each man to keep isolated in his own little set, and to look upon the majority of his fellow citizens in a different light from that in which he should regard them. We have the same race, the same love and hate, the same likes and dislikes, the same desires for the betterment of the land, the same tendency, ever needing to be checked and corrected, to lapse from good into evil. We are all of the same race, and we are all of the same mind. We are all of the same race, and we are all of the same mind. We are all of the same race, and we are all of the same mind."

"The success of the law for the taxation of franchises recently enacted in New York state offers a strong contrast to the present breakdown of the country. It is a law which is intended to make an impression upon the real and dangerous evils which have excited such just popular resentment. We are all of the same race, and we are all of the same mind. We are all of the same race, and we are all of the same mind. We are all of the same race, and we are all of the same mind."

"If on the other hand Providence and our own energy and good sense bring prosperity to us, all will share in that prosperity. Our duty is to build up, rather than to strike down, and that we can best help ourselves, not at the expense of others, but by heartily working for the benefit of the common good of each and all."

UNIVERSITY OF UTAH.

Salt Lake City.

The University of Utah includes, besides the college preparatory school, the State Normal School, a preparatory school and a kindergarten school.

Special training courses are offered in science, literature and arts, and in mining and electrical engineering.

The State Normal School offers complete courses in normal and kindergarten training. One hundred free normal students are admitted each year.

Courses preparatory to law, medicine and the college courses, are offered. Studies leading to a practical business course are given.

Magnificent site, new buildings, splendid equipment.

Entrance examinations, Sept. 26, 28; registration Oct. 1.

Send for Annual which gives full information concerning subjects, courses, etc. D. R. Salt Lake City.
